

Blockchain Crowdfunding Launchpad

COMPETITIVE ADVANTAGES

Yield benefit for backers

Governance voting power

Secure & refundable deposits

Deflationary token value

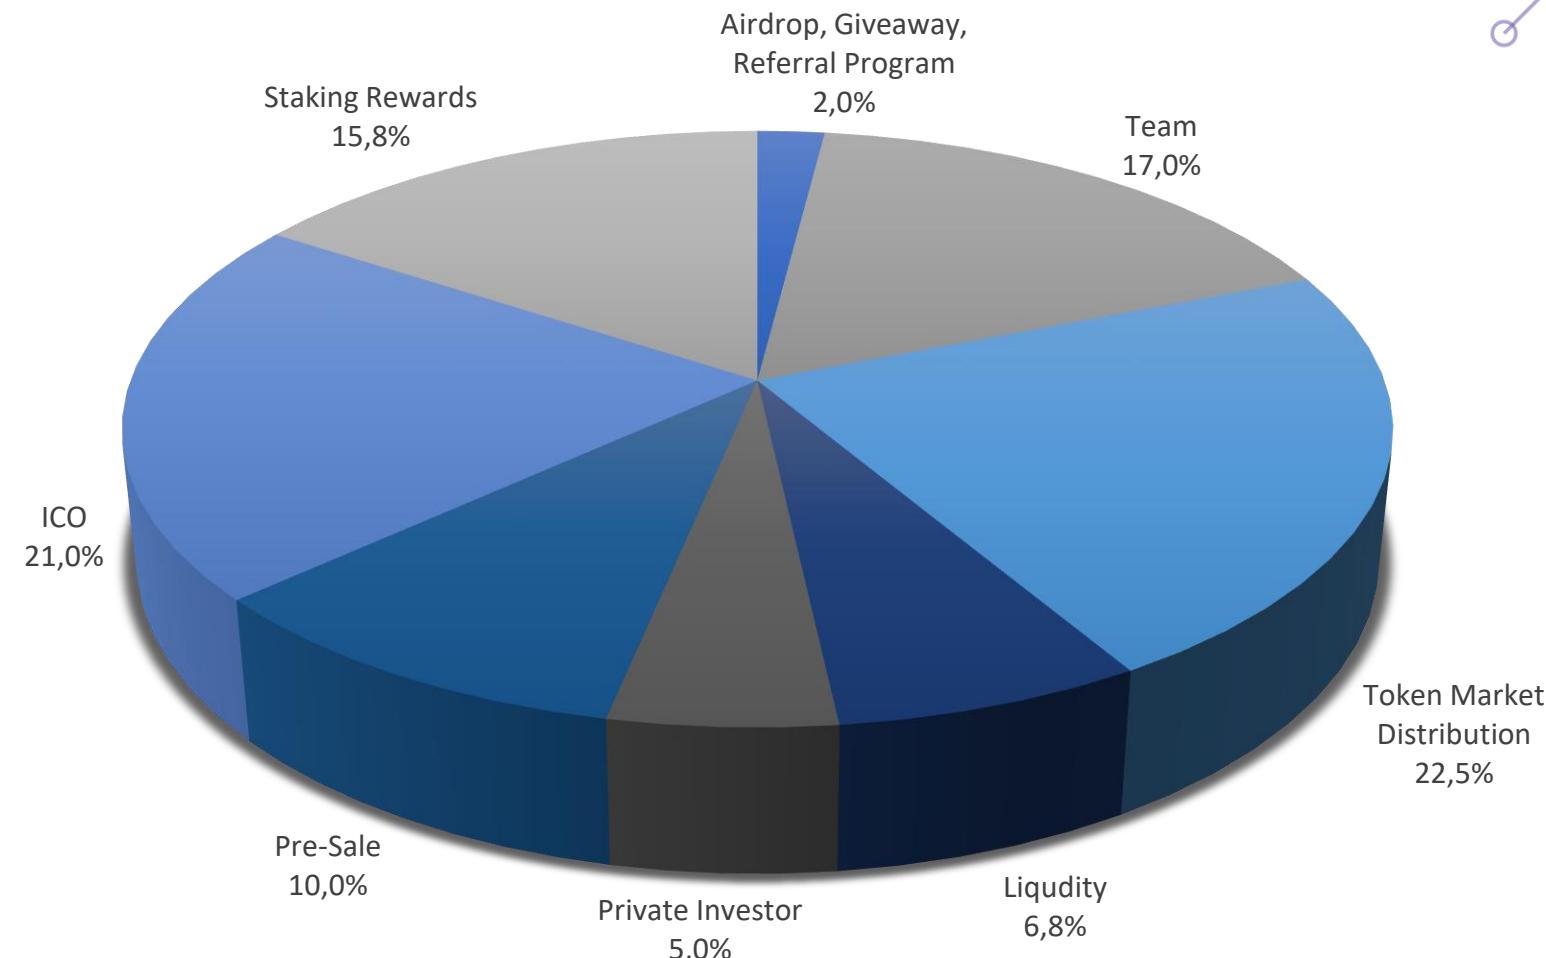

Low-risk investment

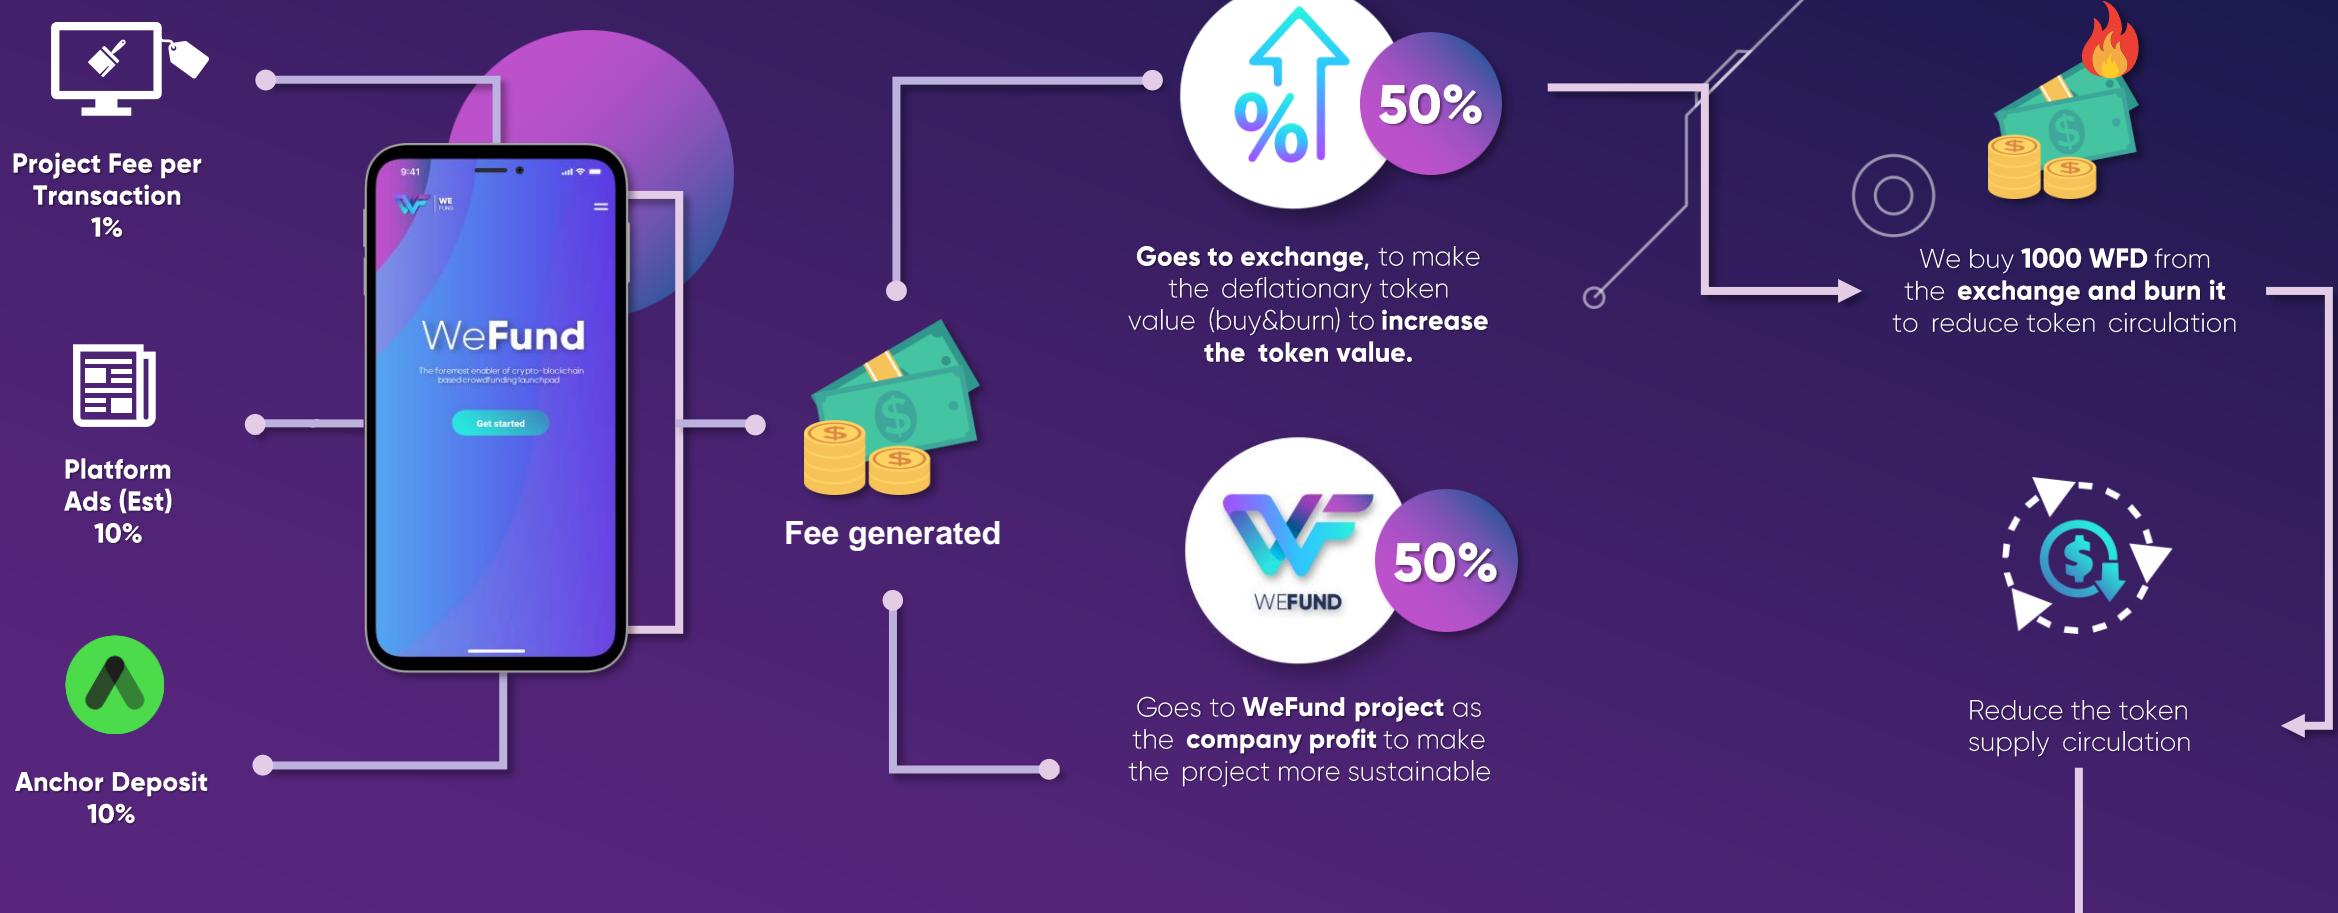

NFTs mirroring real-world assets

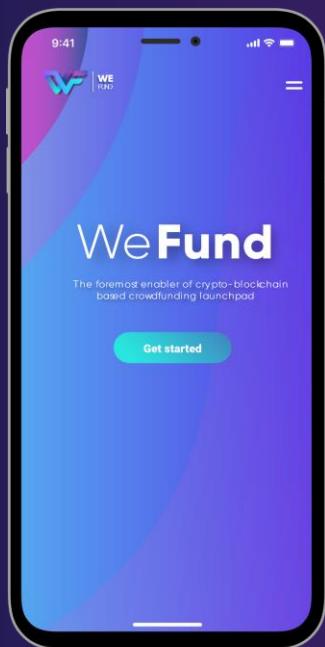

TOKENOMICS

REVENUE MODEL

WFD TOKEN MARKET DISTRIBUTION

The amount of the token that will be released in the market will be decided **based on the platform capacity**. This amount will be **25%** of the token we need to buy-burn in the exchange (the amount generated from the platforms' fees)

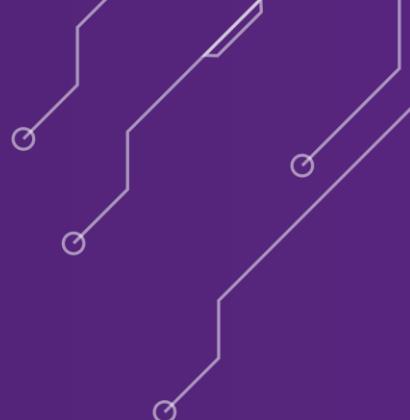

WeFund invests in new projects hosted on the platform

Based on this scenario, WeFund can release **250 WFD** tokens and put them up for sale on the Wefund website and platform, so the people can buy.

CALCULATION OF PLATFORM SIMULATION (EXAMPLE)

PLATFORM SIMULATION

UST	Fee	UST	Qty Buy&Burn Exchange	Token To Sell in Market	Qty We Fund Market Supply	Market Cap	Value
5.000.000	21,00%	1.050.000	517.864	129.466	35.611.602	35.126.229	0,9864
5.000.000	21,00%	1.050.000	525.000	131.250	35.217.852	35.255.696	1,0000
UST invested in the platform to financing the projects	Platform Fee,1% transection + 10 Anchor protocol + 10 (Estimade) for ADS	UST generate from the Fee	50% of the UST going to the Buy the token from the exchange and after burn it	1/4 of the amount we burned, we will sale (from our platform) to release the 22.5% of the token we need to provide it to the exchange market. This Profit will go to WeFund to help the projet inside WeFund raising funding (WeFund Venture Capital)	Decrasing the market supply of this amount 80.398 WFD, 107.197 token burn and 26.799 release	The market cap increase because we sell 26.799 WFD. the value 1 WFD = \$ 0.97452	market cap increase , token distribution decrease the value increase

TOKEN UTILITY

WEFUND

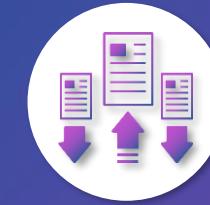

Increasing Value Through
Deflationary Action

Ads Payment

0% Transaction Fee

If a project proposer uses the **WFD token** to collect funding, **WeFund** will feature the project with prioritized ad placement to support projects hosted on our platform

ROAD MAP 2021-2022

NOW

Smart Contract : Prototype V1
Platform Developement :
Demo App and Web

Q4 2021

Presale Token
Development & Protocol Integration
(Anchor & Mirror)
Platform Launch Kickstarter Crypto Project

Q1 2022

NFT Integration
Protocol & NFT Demonstration

Q2 2022

ICO
Game Industry Integration

Q3 2022

Sport Industry Integration
Creative Industry Integration

Q4 2022

Real Estate Integration

TOKEN VALUE

	Token Qty (WFD)	Token Value	Target Amount
Pre-Sale	5.000.000	\$ 0,06	\$ 300.000
Phase 1	10.000.000	\$ 0,50	\$ 5.000.000
ICO	21.000.000	\$ 1,41	\$ 29.700.000
Total	36.000.000		\$ 35.000.000

Our Token Supply In Total is **100.000.000 WFD** Tokens.

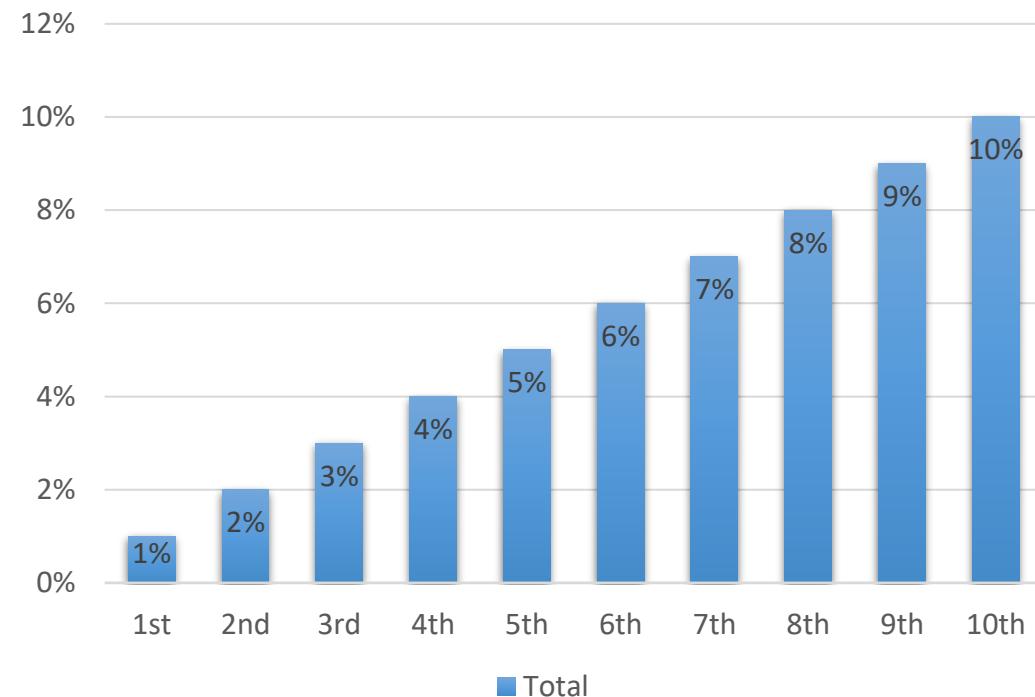

1

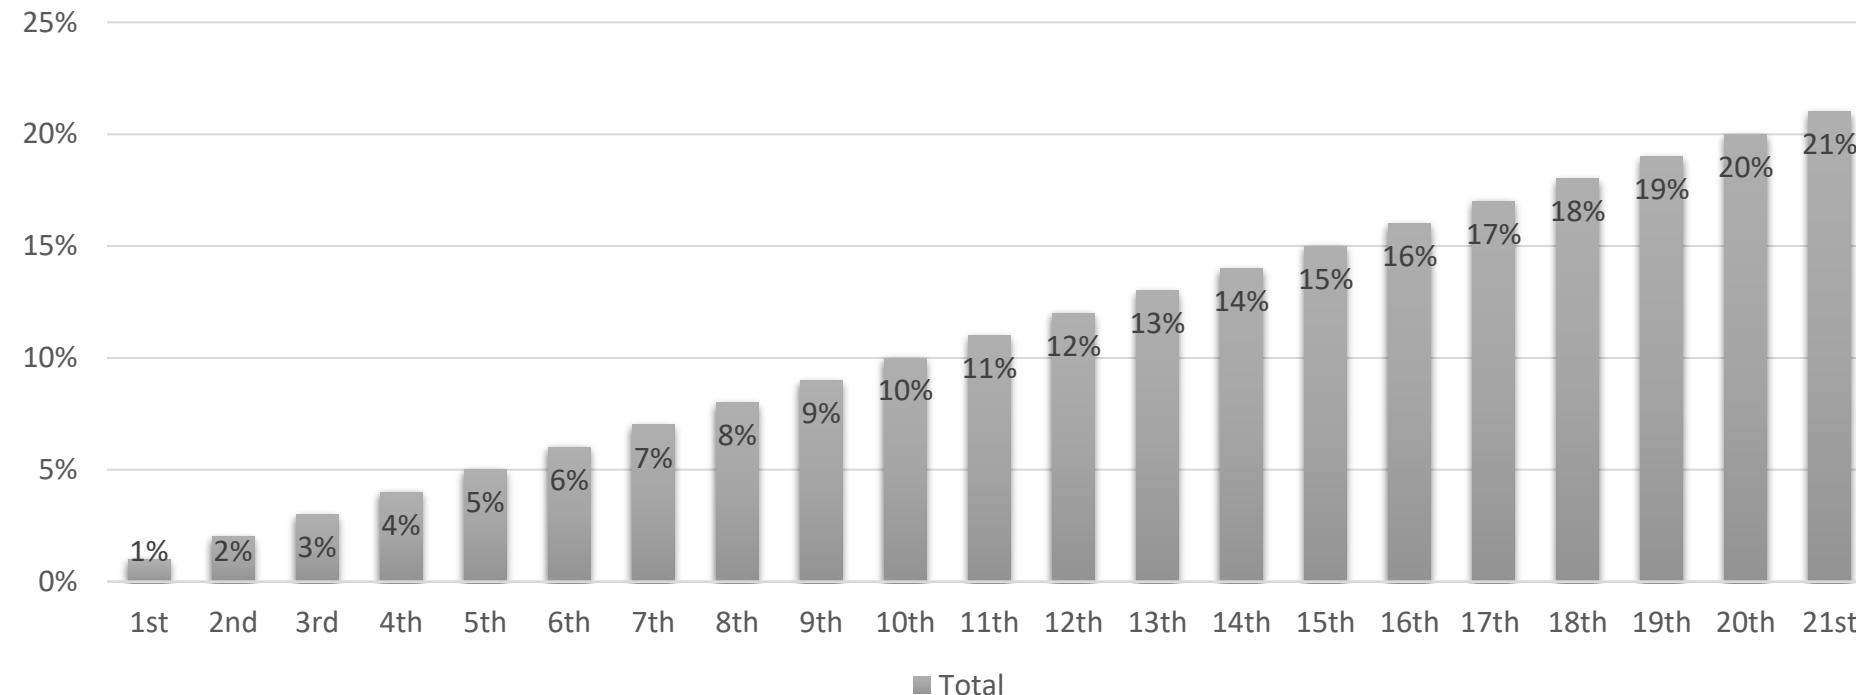

PRIVATE INVESTOR VESTING PERIOD

**2**

PRESALE VESTING PERIOD

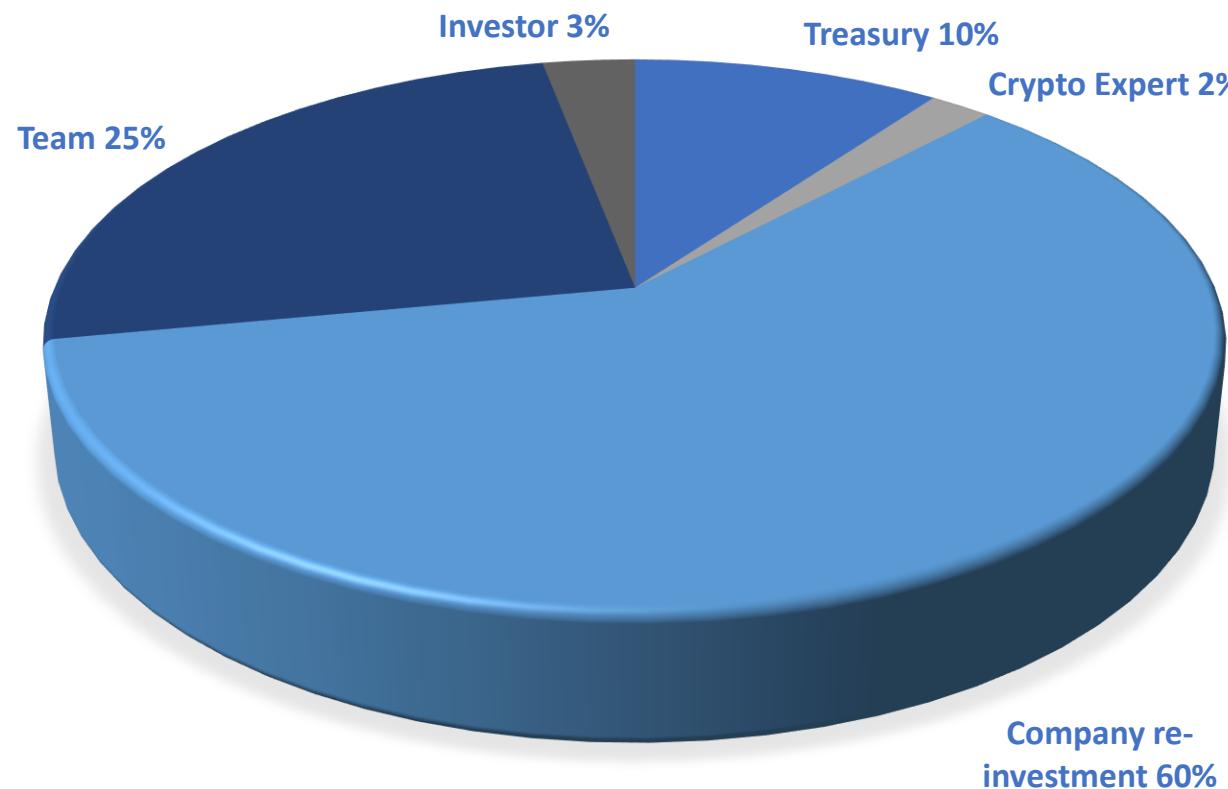

3 TEAM TOKEN VESTING PERIOD

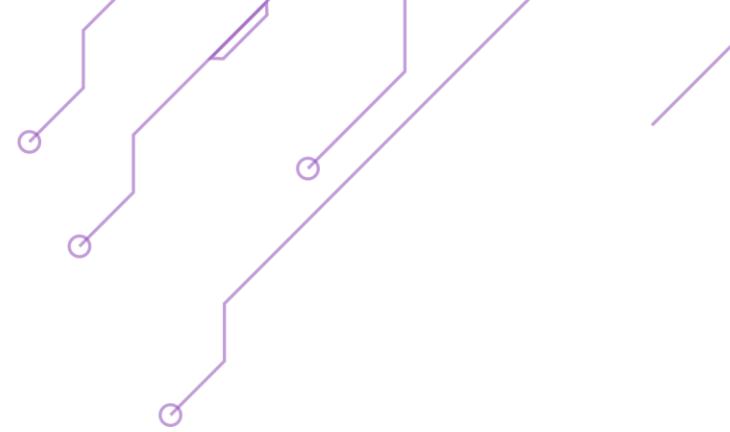

NOTE : the private investor vesting will be started release first after **the ICO launch, together with pre-sale vesting period and the ICO**. The ICO vesting period will **be directly release**, so the token will not be locked up and the last one will be the team token vest starting to release after the Investor vesting will be finished.

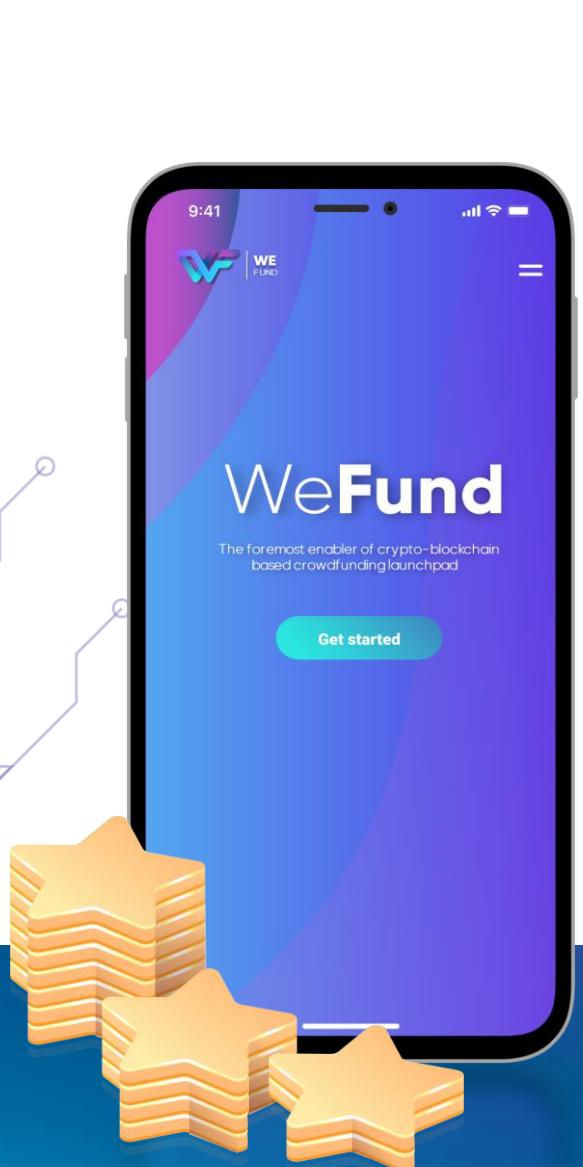

PROFIT DISTRIBUTION

INTRODUCING OUR WEB-APP PLATFORM

COMING SOON

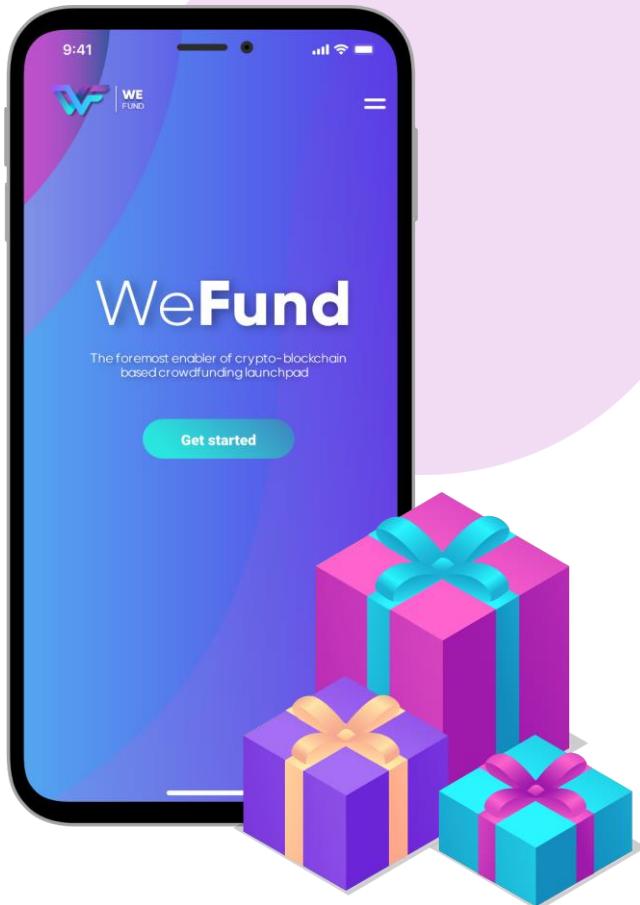

A Kickstarter for Crypto-Project

Our Web App Platform Will Be Ready December 2021

During the trial period, transaction fees are set to **5%**
to help autofinance the project

BENEFITS FOR PROJECT PROPOSERS

Anyone can propose cool project ideas or even fund projects that already exist in the world.

Proposers can **connect directly** to investors (including WeFund), fans, backers, or venture capital.

Proposers can **create ad campaigns** on WeFund to get premium ad placement

Proposers benefit from funding **plus 10%** generated from Anchor

The proposers **have the option** to offer profit sharing/token allocation, etc to project backers.

BENEFITS FOR BACKERS SIDE

Investor, Venture Capital, or WeFund can **easily find an amazing project** to be funded directly on the platform without manually finding a cool project themselves

There is **no minimum or maximum budget** to be invested in a project, that is, everyone can be the investor

Backers, Fans, or Supporters **can fund the project**, plus get the benefits of **10%** generated from Anchor & profit sharing (depending on the proposal of its project)

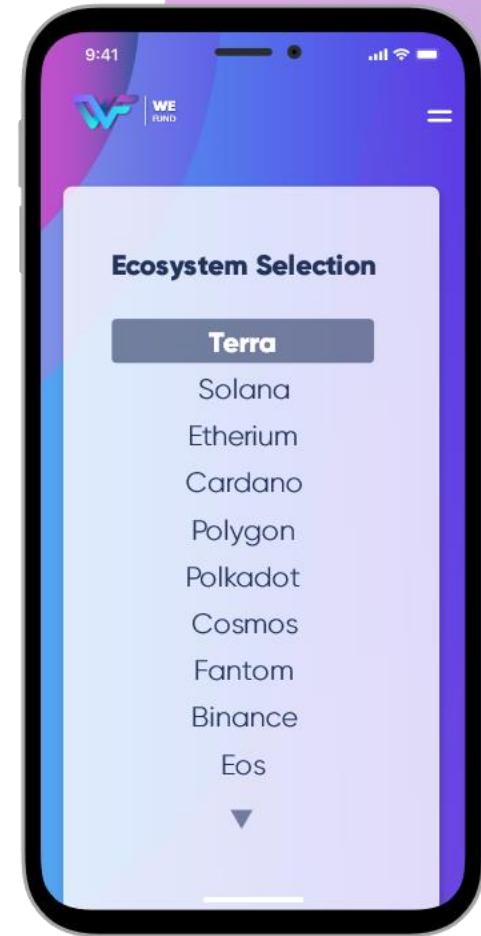

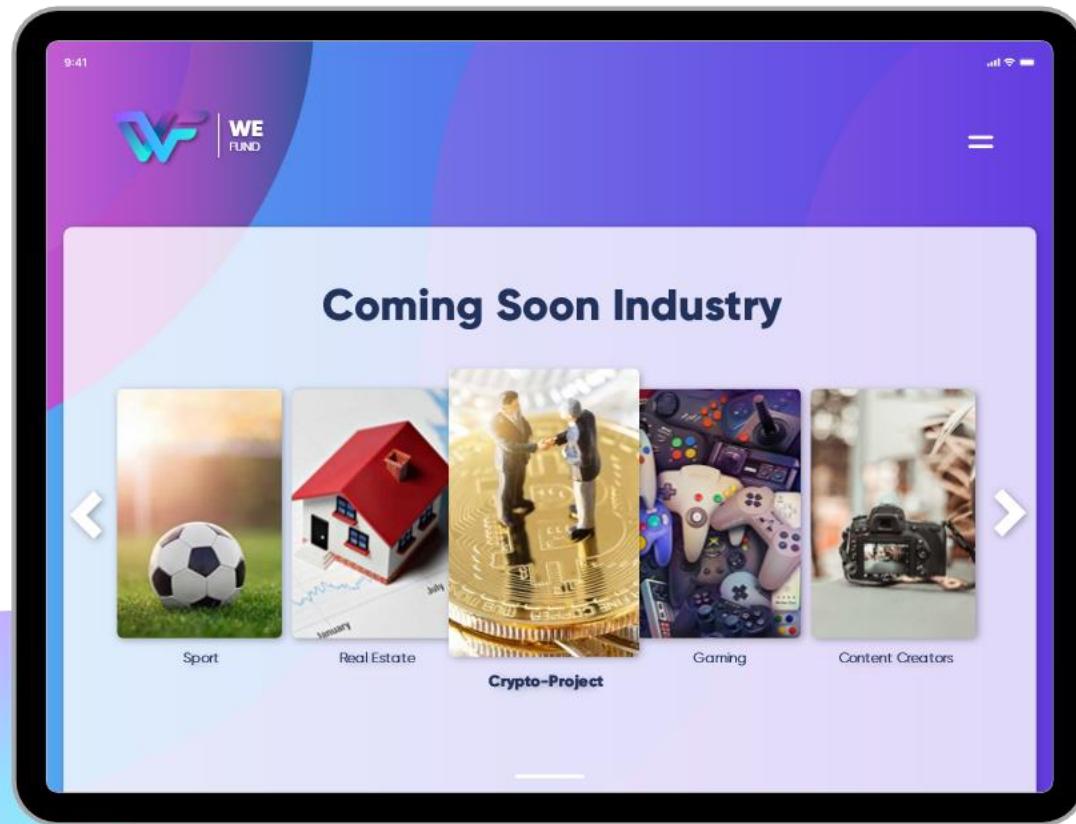

WeFund platform will be the **bridge between the real world and blockchain**, meaning in the future, Everybody can fund projects, whether funding in crypto or in fiat.

VALIDITY PROCESS

Current Process :

1. Advisor will review the project, if it makes sense or no
2. Verified
3. Funding started

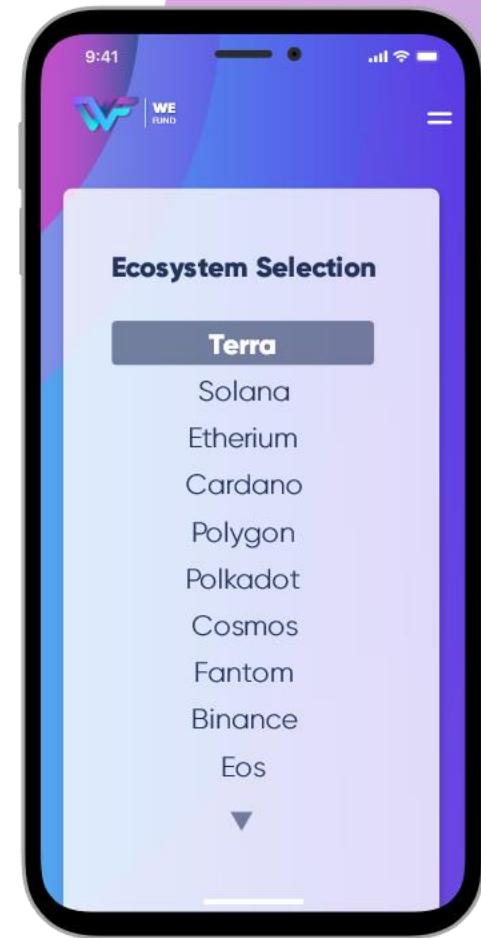

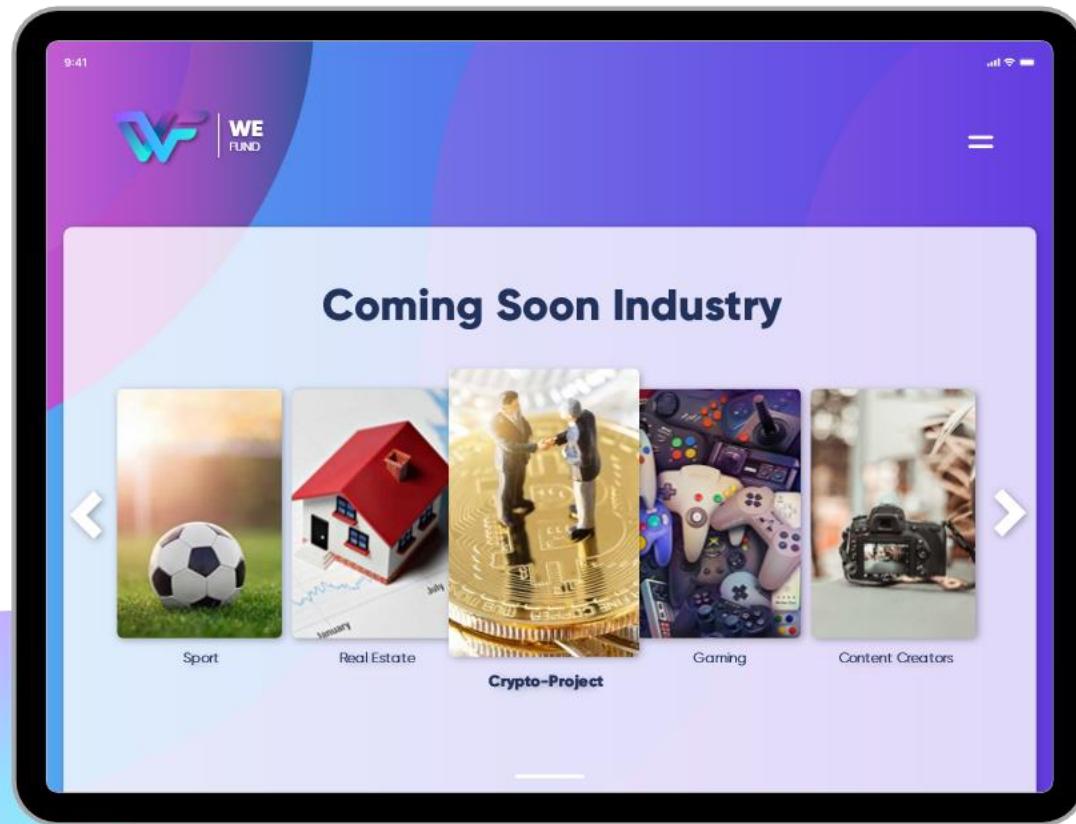

In the future will be :

1. Machine learning will verify the project automatically
2. Verified
3. Funding started
